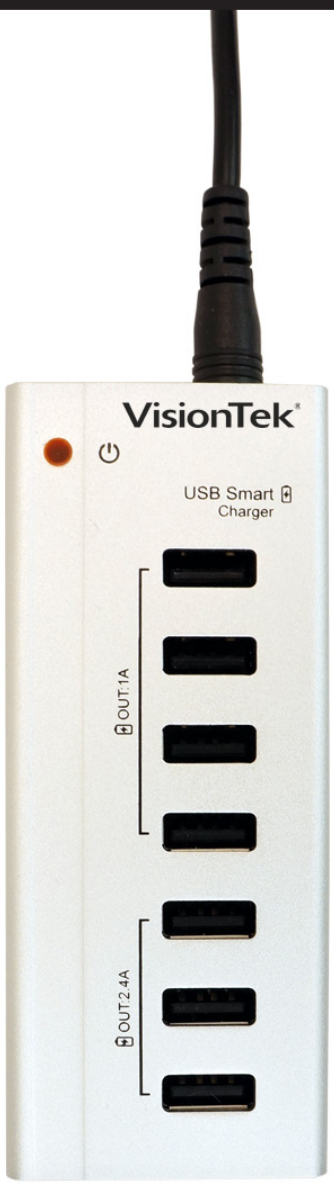
VisionTek®

High Power USB Seven Port Charging Hub

VisionTek Part# 900726



FAST CHARGE UP TO SEVEN SMARTPHONES, TABLET COMPUTERS, EREADERS… VIRTUALLY ANY USB CHARGEABLE MOBILE DEVICE!

The use of multiple mobile devices by families and small business, health care, and restaurant operations is a common daily occurrence.

Unfortunately, power adapters for devices can get lost and wall outlets can only charge two devices simultaneously. Typical charging hubs don't offer enough ports and/or enough power per port so you spend time waiting for a full charge or worse, only getting a partial charge.

The VisionTek High Power USB Seven Port Charging Hub is the uncommonly powerful, centralized charging solution for charging up to seven devices as fast as the factory adapter. It features four 1 amp ports for charging small mobile devices like Apple® iPods® and iPhones®, and three 2.4 amp ports for charging iPads®, tablet computers and smartphones that require higher amperage power charging.

Charges All Your Legacy to Latest Devices
Because the VisionTek High Power Charging Hub utilizes the common USB connector found on a wide variety of devices, all of your new and old USB devices can be charged at their optimum rate and speed.

Looks Great on the Desktop; Works Great On-the-Go
While its silver anodized aluminum housing beautifully complements your desktop workspace, the VisionTek High Power Charging Hub is lightweight and small enough to be easily carried in a pocket or travel bag. Take it from home to office and even on trips so everyone in the family can charge safely and conveniently.

Looks Great on the Desktop; Works Great On-the-Go
While its silver anodized aluminum housing beautifully complements your desktop workspace, the VisionTek Charge & Sync Hub is lightweight and small enough to be easily carried in a pocket or travel bag. Just connect the sleek hub to a computer with the included USB 3 cable to turn it into a four port bus powered (no AC adapter needed) charging and data transfer hub. That use flexibility makes the VisionTek Charge & Sync Hub the ideal connectivity solution for mobile office and "in the field" users.

Works With New and Old Devices
Because the VisionTek Charge & Sync Hub is USB 3.0/2.0 compatible, all of your new and old USB devices can be powered and/or charged, and transfer data at their optimum rate and speed.

KEY FEATURES

- Creates a centralized, high-power seven device charging station for home or workplace.
- Four 1A and three 2.4A ports charge nearly every type of mobile device, including the latest tablet computers, as fast as the factory supplied power adapter.
- No computer connection needed…just plug into any wall outlet to start charging.
- Eliminates searching for missing adapters or ugly "wall wart" adapters plugged into multiple wall outlets.
- LED indicator light shows when unit is powered on.
- Can also be used to power desktop devices.
- Compact and lightweight for travel use when outlets are limited.

SPECIFICATIONS

- **Interfaces:** 4 x 1A charging ports, 3 x 2.4A charging ports
- **Material:** Silver colored anodized Aluminum
- **Dimensions:** 0.90" x 4.30" x 1.80" (H x L x W)
- **Weight:** 0.29lb
- **External Power Supply:** Auto switching UL listed
- **Input:** AC 100-240V, 50Hz/60Hz Output: DC+12V/5A (60 watt)
- **Device Compatibility:** iPad, iPod, iPod Touch and iPhone; mobile phones; Android™ & Windows® tablets; Kindles, Nooks & eReaders; game consoles, POS scanners, 3-D glasses; virtually any USB chargeable device
- **Certifications:** CE, FCC, RoHS compliance
- **Warranty:** 18 months
